ABOUT YOUR PHONE

The MITEL NETWORKS 5020IP Phone has ten fixed-function keys (SUPERKEY, TRANS/CONF, REDIAL, MESSAGE, HOLD, CANCEL, SPEAKER, MICROPHONE, ▲, ▼) and 14 personal keys with built-in status indicators. The personal key on the bottom right is always your Prime Line; the remaining personal keys can be programmed as:

- Feature keys (for example, Swap). You can program feature keys from your phone or using the Desktop Tool. Your administrator can also program feature keys.
- Speed Call keys. You can program speed call keys from your phone, or using the Desktop Tool.
- Line Appearances. Only the administrator can program line appearances.

**Note:** For more information on the Desktop Tool, talk to your system administrator.

Your phone also features display-assisted selection of features, on-hook dialing, and a large Message Indicator.

**Note:** When using the SuperKey, press Cancel to back up one menu level.

**IMPORTANT NOTE FOR HEADSET USERS:**
Mitel Networks Headsets with Feature Control Switch (PN9132-800-500-NA/9132-800-501-NA) must be installed in the dedicated headset jack (the jack nearest the front of the phone). Installation will disable your handset microphone. Disconnecting the headset at the jack or at the quick-disconnect plug restores handset operation.

Using the 5020 IP Phone in Remote Mode

Remote Mode allows the 5020 IP Phone to be used in the home or in other locations away from the office. For information on how to program the 5020 IP Phone for remote operation, refer to the Remote IP Phones Guide available at www.mitel.com

About Feature Access Codes

Use of some features requires dialing access codes. The codes are flexible and may be different than those in this guide. Ask your Administrator for a list of codes you should use.

For Users on Resilient 3300 ICP Systems

If during a call, you hear two beeps repeated every 20 seconds it means that your phone is switching to a secondary 3300 ICP system. The call continues but the keys and features on your phone stop working. The keys and most features begin working again after you hang up. Normal operation resumes when your phone switches back to the primary system. If your phone is idle and switched to the secondary system, you'll see a flashing rectangle on the display. The rectangle remains until the switch to the primary system is complete.

TIPS FOR YOUR COMFORT AND SAFETY

Don't cradle the handset!

Prolonged use of the handset can lead to neck, shoulder, or back discomfort, especially if you cradle the handset between your ear and shoulder. If you use your phone a lot, you may find it more comfortable to use a headset. See Headset Operation (with Feature Control Switch) for more information.
Protect your hearing

Your phone has a control for adjusting the volume of the handset receiver or headset. Because continuous exposure to loud sounds can contribute to hearing loss, keep the volume at a moderate level.

Adjusting the viewing angle

The stand built into your phone tilts to give you a better view of the keys.

To tilt your phone for better viewing:
1. Press the tilt-release paddle on the phone base.
2. Tilt your phone to the desired angle.
Changing Handsets

Your 5020 IP Phone is compatible with several specialty handsets. To remove the handset shipped with your phone from the handset cord:

1. Bend a paper clip to produce approximately 4 cm (1.5 in.) of straight wire.
2. On the handset, locate the plastic groove leading into the handset jack. The groove is on the side of the jack that is closest to the handset microphone.
3. Slide the end of the wire into the handset jack along the groove until it stops underneath the handset cord clip.
4. While gently pulling on the handset cord, use the wire to pry the clip upward. The cord will separate from the handset.
5. Store the original handset in a safe place.

**Record a Call**

This feature uses your voice mail system to record your phone conversations.

**Note:** You may be required by law to inform the other party that you are recording the conversation. For specific instructions, consult your system administrator.

*To start recording while on a two-party call:*  
- Press the **Record Call** key. (See Feature Keys elsewhere in this guide for instructions on programming a **Record Call** key to your phone.)

**Note:** Your system may be programmed to automatically begin recording external calls when you or the other answers.

*To pause recording:*  
- Press the **Pause** softkey.

*To resume recording after pausing:*  
- Press the **Resume** softkey.

*To stop a recording without saving it:*  
- Press the **Stop&Erase** softkey.

*To stop and save a recording:*  
- Press the **Stop&Save** softkey.

Putting the call on hold saves the recording; taking the call off hold starts a new recording. Depending on system programming, hanging up, or pressing **TRANS/CONF** or a **DSS** key, may also save the recording.

*To listen to a recording:*  
1. Lift the handset.  
2. Access your voice mailbox.  
3. Follow the prompts to retrieve the recording.
Hot Desking

Hot Desking allows you to log into the telephone system from any phone designated as a Hot Desk phone. Simply log in at the phone using your assigned Hot Desk User Extension Number and the phone immediately assumes all your speed dials, features keys, call forwarding setup, and line appearances - even your language preference for the display. Any changes you make to the phone while you are logged in--for example, adding a speed dial--are saved to your personal profile. Logging in activates your profile on any phone that supports Hot Desking.

**Note:** All Hot Desking profiles have 13 programmable keys. If you log into a phone that has a fewer number of keys, the extra ones are "hidden". Only the use of the extra keys is lost, not the features assigned to them.

*To log into a Hot Desking phone (the phone must be idle):*
1. Press the **HotDesk** softkey.
2. Press the **Login** softkey.
3. Enter your Hot Desk User Extension Number
4. Press the **OK** softkey.

*To log out of Hot Desking phone (the phone must be idle):*
1. Press the **HotDesk** softkey.
2. Press the **Logout** softkey.
3. Press the **Confirm** sofkey.

**Note:** Your profile can only be active on one phone at a time. If you log in from another phone without logging out from the first one, the system will automatically deactivate your profile on the first phone.

**Hot Desk Remote Logout**
A user that has forgotten to log out of a Hot Desking phone can be logged out using any phone that supports Hot Desk Remote Logout.

*To remotely log out a Hot Desking phone:*
1. Dial **111**.
2. Dial the Hot Desk User Extension Number that you want to log out.
Call History

Call History keeps track of the names (if available) and telephone numbers of missed calls, answered incoming external calls, and outgoing external calls. Once enabled on your phone by your system administrator, it functions automatically.

To display the call history, and view call detail:

1. Press the Call History feature key. The total number of missed calls is displayed in brackets ( ), the number of new missed calls is indicated with a *
2. To browse through the list of missed calls, press the Yes softkey, followed by the UP and DOWN keys to scroll through the list. To view answered or outgoing calls, press the No softkey (once for answered, twice for Outgoing). Use the UP and DOWN keys to scroll through the list of answered or outgoing calls.
3. To view the number of the call, press the Detail softkey while the call record is displayed. Pressing the Next softkey displays the time and date.

To return a call:

1. Display the call you want to return.
2. Do one of the following:
   - If the call is internal, and the caller name is known, press the Call softkey. For unknown numbers, the Call softkey is not displayed.
   - If the call is external, and you normally need to precede external calls with a digit such as 9, its likely that your system administrator has programmed your system to insert the 9 for you. In this case, pressing the Call softkey initiates the call immediately. Sometimes the system will be unable to complete the dialing automatically. When this happens, you are prompted to edit the dialed digits manually by placing a flashing cursor at the first digit position, using the --> softkey icon in the middle of the display. Use the --> softkey to move the cursor to the appropriate digit and press Clear to delete the digit. When you have deleted the required digits, type the correct digits to replace them. When you have the dial string edited to suit your needs, press the Call softkey to dial the number.
To delete all missed, answered, or outgoing call logs:
1. After selecting the type of logs you wish to delete, press the **DeleteAll** softkey.
2. Confirm that you do want to delete all items by pressing the **Yes** softkey.

To delete a particular call from the call log:
- With the call log that you want to delete displayed, press the **Delete** softkey.

**Tag Call**

Tag Call allows you to signal that you are the victim of a threatening or malicious call. Using the tag, your system administrator or telephone company can identify the source of the call and provide this information to appropriate personnel or authorities.

**CAUTION:** Tagging a non-malicious call may result in fines or other penalties.

To tag a malicious call:
- Press the **Tag Call** feature key while the call is in progress. See "Feature Keys" elsewhere in this guide for information on programming a Tag Call feature key to your phone.
  -OR-
- Press **TRANS/CONF.**
- Dial ***55.**

If the call was successfully tagged "Thank You" is shown on the display; otherwise, "Not Allowed" is displayed.

**Note:** Tag Call can be used on active two-party calls only. Calls on hold and conference calls cannot be tagged.
