- 8 **Softkeys area** – view softkey labels.
- 9 **Response/Status area** – view date/ time, system warnings, and status of Phonebook and Database connections

Note: For additional information about all the 5550 IP Console call-handling tools and features, refer to the 5550 IP Console Help. To access the Help, select **Help** from the main Menu area, then select **Contents**.

Answer a Call

- Lift the handset (optional).
- Press **Answer** on the keypad
OR
- Double-click the call in the **Incoming Calls** display
OR
- Press a [F1] to [F7] softkey
OR
- Press **Retrieve**, then the incoming call ID digit (1-6).

Transfer a Call

- Dial the destination number.
- Press **Release** on the keypad to complete the transfer and disconnect the call from the console.

Recover a Call

- Press **Recover** immediately after completing the transfer
OR
- Double-click the call in the **Transferred Calls** display.

Place a Call on Hold

- Inform the caller that you are placing the call on hold.
- Press **Hold** on the keypad.

Park a Call

- Press or click **[Park Call]** and observe that the Park Call form replaces the Destination area.
- Dial the desired extension number.

Note: You can also use the [Park At] softkey in the Directories panel. Refer to the 5550 IP Console Help for detailed instructions.

Retrieve an Incoming, Held, Transferred, or Parked Call

- Press **Retrieve**, then the call ID digit (1-9) of the call you want to retrieve
OR
- Double-click the call in the displayed **Queued Calls** tab.

Answer a Recall

- Press the **[Recall]** softkey
OR
- Press **Answer** on the keypad.

- Ask if the caller wants to continue waiting or wishes to be ring another extension.

Transfer a Recall to Voice Mail

- Press **Voice mail** on the keypad to transfer a recall to the extension's voice mailbox.

Conference a Call

- With the two parties connected to the console — one in the Source area and the other in the Destination area — press the **[Conference]** softkey.

To split a conference to speak privately to either caller

- Press either **[Source]** or **[Destination]** softkey.

To add more parties to a conference

- Dial the number of the next party.
- Press the **[Conference]** softkey.

If the line is busy or unanswered or the person is unavailable

- Press **Cancel** on the keypad to reconnect to the conference. You may continue adding more parties to the conference.

To release the conference from the console

1. Press **Release** on the keypad.

Note: Once you release the conference, you cannot re-enter it.

About the Console Keypad

The console keypad is used for dialing, call processing, and accessing system features.

You can adjust the slope of the keypad and detach or from (or attach it to) the handset cradle.

You can also use the console keypad to maximize and minimize the Main Window Directories and Queued Calls panels.

Use Volume to increase (+) or decrease (-) the ringer and earpiece volume in the handset or headset. Mute enables/disables the microphone in the headset or handset.

To maximize/minimize a panel

1. Press the associated keypad key, for example, Phone Book, or Incoming Calls.

If the panel was maximized on screen at the first keypad press, it is minimized.

If the panel was minimized on screen at the first keypad press, it is maximized.

2. Press the associated key to toggle between the maximized and minimized views.

Remote Operation

To place the Mitel 5550 IP Console in Remote Mode for teleworking:

1. Press the Volume UP key (+) while powering up the console.
2. To exit from Remote Operation, press Volume DOWN (-) key while powering up the console.

Note: For more information on how to program your IP Phone for remote operation, see your System Administrator.

Using the Console Keypad

Fixed Function Keys

Fixed Function keys are used to answer and manage calls.

- ANSWER** Answer calls on a “first-come first served” basis (the default) or according to the priorities assigned using the Options command in the Tools menu
- RELEASE** Complete a call transfer
- HOLD** Put a call on hold
- RECOVER** Return a call you transferred to the wrong extension to the console
- RETRIEVE** Answer an incoming call, or reconnect to a held, transferred, or parked call
- CANCEL** Clear misdialed numbers
