Mitel 8528 Telephone Quick Reference Guide

This guide provides information for frequently used features. For more information about these and other features, refer to the user guide. For voice mail information, refer to the voice mail user guide for your system.

Feature Buttons

Most of the following feature codes work when your telephone is idle. However, if you are on an active call or if the telephone is off-hook, you may need to press (Special) to activate the feature before you enter the feature code.

If you make a mistake when entering numbers or characters, you can press (Hold) to move the cursor to the left and delete the characters entered, or you can press * to cancel the feature.

### Commonly Used Feature Codes

Contact your system administrator for more information about system features.

Mitel® 8528 Telephone User Guide – Issue 1, November 2009
Answering Calls

Lift the handset, or press (Speaker) to answer a call while using a headset or to answer a call in Handsfree Mode.

Placing Emergency Calls

Dial the emergency number (911 U.S. or 999/112 Europe). The system immediately places the emergency call as soon as you dial the number, even if you do not select an outside line.

Placing Internal (Intercom) Calls

With or without the handset lifted, dial the extension number. If you enter incorrect digits, you can press (Hold) to move the cursor backward, deleting the last digits entered. If you are using Handsfree Mode, listen for the double tone, and then begin to speak.

Placing External Calls

Press the Outgoing button, an unlit Call button, or enter the Outgoing Call access code (8 is the default code), and then dial the number.

Redialing External Numbers

With or without the handset lifted, press the (Redial). The system automatically selects a line and dials the number.

Transferring Calls to Other Extensions

1. While on the call, press (Transfer), and then enter the extension number.
2. Do one of the following:
   • Wait for an answer, announce the call, and then hang up. If the extension is unavailable, press the flashing IC or Call button to return to the caller.
   • Hang up to transfer the call and disconnect the call from your telephone.

Forwarding Calls

1. Press the Fwd button, and then enter the feature code, if applicable. ENTER FORWARD DEST appears.
2. Enter the extension number, or press the Outgoing button or enter the Outgoing Call access code (8 is the default code), and then dial the phone number.

Placing Conference Calls

1. While on the first call, press the Conf button to place the call on hold. CALL NEXT PARTY TO CNF appears.
2. Place a call to the next conference party. For external calls, press the Outgoing button or enter the Outgoing Call access code (8 is the default code), and then dial the number.
3. After the party answers, announce the conference, and then press the Conf button to place the call on hold. If necessary, repeat this step to add the remaining conference party.
4. Press the Conf button again to start the conference. CNF IN PROGRESS appears.

Viewing and Responding to Messages

1. With the handset on-hook, press (Message) Messages are displayed as first in/first out. If there is more than one message, you can repeatedly press (Message) to scroll through the messages.
2. When the desired message is displayed, press #, or lift the handset for privacy, and then press # to respond. (If your handset is off-hook and you press (Message), you automatically place a call to the party or message center who left the message.)

Using Do-Not-Disturb

1. Press the DND button, and then do one of the following:
   • Press (Up) or (Down) to scroll through the messages.
   • Enter the two-digit number for the DND message.
2. After selecting the message, enter the additional text for the DND description, if applicable.
3. Press (Speaker) lift and replace the handset.

Placing a Page Announcement

1. Press 7.
2. Enter the page-zone number (0 to 9).
3. After the tone, make your announcement, and then hang up.
Notice

This guide is released by Mitel Networks Corporation and provides information necessary to use the Mitel 8528 Telephone. The guide contents, which reflect current Mitel standards, are subject to revision or change without notice.

Some features or applications mentioned may require a future release and are not available in the initial release. Future product features and applications are subject to availability and cost. Some features or applications may require additional hardware, software, or system administrator assistance.

For sales, service, or technical support, contact your local authorized provider:

Enter provider information above.

If you do not know the contact information for your local provider, use the “Partners” link at the top of the Mitel home page (www.mitel.com) to find a location near you.

If you have any questions or comments regarding this user guide or other technical documentation, contact the Technical Publications Department (USA) at:

tech_pubs@mitel.com

Important Safety Instructions and Precautions

Remember the following safety guidelines when using the telephone.

Programming Emergency Numbers

Make sure to do the following when programming emergency numbers and/or making test calls to emergency numbers:

- Remain on the line and briefly explain to the dispatcher the reason for the call.
- Perform tests during off-peak hours such as early morning or late evenings.

Safety Notices

The following notices may appear on the product or in the technical documentation.

<table>
<thead>
<tr>
<th>Notice</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>![CAUTION]</td>
<td>Caution indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury and/or damage to the equipment or property.</td>
</tr>
<tr>
<td>![WARNING]</td>
<td>Warning indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.</td>
</tr>
<tr>
<td>![DANGER]</td>
<td>Danger indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.</td>
</tr>
<tr>
<td>![Exclamation Point]</td>
<td>The exclamation point within an equilateral triangle indicates that important operating and maintenance (servicing) instructions are included in the literature accompanying the product.</td>
</tr>
</tbody>
</table>

Maintenance and Repair

There are no user serviceable parts inside the telephones. For repairs, return the telephone to an authorized Mitel provider.

NOTE Changes or modifications not expressly approved by Mitel may void the user’s right to operate the equipment.
Power Requirements

⚠️ CAUTION

**Telephone Damage Hazard.** To avoid damaging the telephone or Programmable Key Module Interface Module (PKM IM), make sure the PKM IM is connected to the proper power supply before powering on. Contact your system administrator for more information.

When a PKM IM is attached to the telephone, the telephone requires the Mitel Universal 24 VDC power adapter, part number 50005300.

If necessary, contact your system administrator for assistance before connecting the PKM IM to the centralized power source.

Make sure the PKM IM is plugged into an uninterruptible power supply (UPS). If the PKM IM is plugged into the UPS and the power fails, it should remain powered on for about 10 minutes. If the PKM IM is not plugged into a UPS and the power fails, the current call is dropped and you will not be able to use the telephone until the power is restored.

Software Updates

⚠️ CAUTION

**Telephone Damage Hazard.** Do not use your telephone or disconnect it while it is updating software.

The telephone may require occasional software updates when new versions are available. The telephone is configured to download the updates automatically. Contact your system administrator for more information.

Product Disposal Instructions

⚠️ This symbol indicates that the product is classified as electrical or electronic equipment and should not be disposed of with other commercial or household waste at the end of its working life. For appropriate disposal and recycling instructions, contact your local Mitel provider.

The Waste of Electrical and Electronic Equipment (WEEE) Directive (2002/96/EC) was established by the European Union to minimize negative impact on the environment, control hazardous substances, and curtail landfill expansion by using the best available recovery and recycling techniques.
Telephone Usage

This equipment is not for connection to the telephone network or public coin telephone service. It is only for use when connected to Mitel systems.

⚠️ WARNING

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

- Do not use this product near water, for example, near a bath tub, wash bowl, kitchen sink or laundry tub, in a wet basement, or near a swimming pool.
- Avoid using an telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.
- Do not use the telephone to report a gas leak in the vicinity of a leak.
- Do not connect directly to the Public Switched Telephone Network (PSTN). Any connection of this telephone to an off premise application, an out of plant application, any other exposed plant application, or to any equipment other than the intended application may result in a safety hazard, and/or defective operation, and/or equipment damage. “Exposed plant” means where any portion of the circuit is subject to accidental contact with electric lighting or power conductors operating at a voltage exceeding 300 volts between conductors or is subject to lightning strikes.
- The socket outlet, if used, shall be located near the equipment and shall be easily located by the user.
- Use only Mitel approved power adaptors.
- The handset supplied with the telephone is not certified for use with any other telephone. Use of the handset with any other telephone may have the potential to cause hearing loss in the event of a lighting strike on the outside plant wiring.
Notice to Canadian Customers

The Class B digital apparatus complies with Canadian ICES-003.

Notice to U.S. Customers

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Notice to European Customers

We, Mitel Networks LTD.
Of, Mitel Castlegate Business Park
Portskewett

Welcome

The instructions in this guide are for using the Mitel 8528 Telephone on the Mitel 5000 Communications Platform (CP). The Quick Reference Guide located at the beginning of this guide is an overview of frequently used features.

Your telephone should be powered on and ready to use. If the display is blank, or if the display name, extension number, or time or date are incorrect, contact your system administrator for assistance.

Because a variety of voice mail products work with the 5000 CP, this guide does not include voice mail instructions. For voice mail instructions, refer to the voice mail user guide for your system. For example, refer to the Enterprise Messaging, Basic Voice Mail, and Embedded Voice Mail Card User Guide, part number 835.3205, or the NuPoint Unified Messaging User Guide on the Mitel Web site (http://edocs.mitel.com). Contact your system administrator for more information about your voice mail system.

NOTE Because many telephone features can be programmed to perform various tasks, some features may work differently than the descriptions in this guide. Contact your system administrator for more information.
About Your Telephone

Your telephone is equipped with a two-line display, a hearing aid-compatible handset, a Message Indicator lamp, an internal speaker and microphone, and three types of buttons.

The 8528 Telephone is shown here. See “Telephone Feature Descriptions” on page 3 for more information about the telephone features.

1 – Handset  5 – Dialpad buttons
2 – Display  6 – Programmable buttons
3 – Ring/Message Indicator  7 – External speaker
4 – Feature buttons
Telephone Feature Descriptions

The following sections describe default configurations. Your telephone may be programmed differently. Contact your system administrator for more information. See “About Your Telephone” on page 2 for telephone feature locations.

Handset

The handset provided with this equipment is hearing aid compatible (HAC). If you are using a headset or if you are in Handsfree Mode, you do not need to use the handset. See “Headset Instructions” on page 7 and “Using Handsfree Mode” on page 29 for more information.

Display

The display provides a two-line, 16-character viewing area for using features and identifying callers. When idle, the display shows user information and the time and date.

Ring/Message Indicator

The Ring/Message Indicator flashes or stays lit to indicate call, message, and feature activity. For more information about messaging features, see “Messages” on page 43. Ring/Message Indicator signals are described in the following table.

<table>
<thead>
<tr>
<th>Indicator Signals</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rapidly flashing</td>
<td>You have an incoming call.</td>
</tr>
<tr>
<td>Slowly flashing</td>
<td>You have a waiting message or callback message.</td>
</tr>
<tr>
<td>On</td>
<td>You are on a call or using a feature.</td>
</tr>
<tr>
<td>Off</td>
<td>Your telephone is idle.</td>
</tr>
</tbody>
</table>

NOTE

The 8528 Telephone uses enhanced speakerphone (both parties cannot talk at the same time).

Speaker

The speaker provides audio for handsfree calls and background music. See “Using Handsfree Mode” on page 29 for information about handsfree calls. See “Listening to Background Music” on page 12 for more information about background music.
Feature Buttons

Feature buttons provide quick access to commonly used features. See the following table for descriptions.

<table>
<thead>
<tr>
<th>Button</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>(Up) ☣ (Down)</td>
<td>Provides volume control for the ringer, handset, and speaker.</td>
</tr>
<tr>
<td></td>
<td>Scrolls through feature options.</td>
</tr>
<tr>
<td></td>
<td>Activates features.</td>
</tr>
<tr>
<td>☣ (Mute)</td>
<td>Temporarily turns off your microphone during a call.</td>
</tr>
<tr>
<td>☣ (Special)</td>
<td>Activates features while on a call. The ☣ (Special) button does not cancel features. To cancel features, press the Star button (*).</td>
</tr>
<tr>
<td>⌨ Redial</td>
<td>Calls the last external number dialed. You cannot redial internal numbers.</td>
</tr>
<tr>
<td>☣ (Hold)</td>
<td>Places the current call on hold. Left/backspace when entering dialpad characters. See “Using the Dialpad Buttons to Enter Characters” on page 23.</td>
</tr>
<tr>
<td>☣ (Transfer)</td>
<td>Transfers the current call. Right/forward when entering dialpad characters. See “Using the Dialpad Buttons to Enter Characters” on page 23.</td>
</tr>
<tr>
<td>☣ (Message)</td>
<td>Connects to your voice mailbox and flashes to notify you of waiting messages. Toggles between Alpha Mode and Numeric Mode when entering dialpad characters.</td>
</tr>
</tbody>
</table>

Dialpad Buttons

Use the dialpad buttons to dial phone numbers, enter feature codes, and to enter characters when using features that require text input.
Programmable Buttons

Your telephone has 16 programmable buttons. The first seven buttons on the telephone are programmed by the system administrator and cannot be reprogrammed. However, you can program the remaining buttons for quick access to features or speed-dial entries. See "Using Programmable Buttons" on page 13 for instructions.

<table>
<thead>
<tr>
<th>Button</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Call 1</td>
<td>Selects an outside line or answers a call.</td>
</tr>
<tr>
<td>Call 2</td>
<td>Selects an outside line or answers a call.</td>
</tr>

<td>Places a conference call.</td>
</tr>
<tr>
<td>Forward</td>
<td>Forwards the call to the specified number.</td>
</tr>
<tr>
<td>Outgoing</td>
<td>Selects an outgoing line for external calls.</td>
</tr>
</tbody>
</table>

Software Updates

When the telephone is plugged in for the first time or after a system upgrade, it may update its firmware. The upgrade process can take up to 13 minutes. During the upgrade, all lamps flash on and off, and the display shows that an upgrade is in process. Do not unplug the telephone during the upgrade.
Telephone Signals

Your telephone has several audio and visual signals to indicate feature activity. The following are a few helpful tips:

- Lit or blinking buttons indicate call or feature activity.
- All telephone button lamps illuminate at the same time for a few seconds when the telephone is reset or powered on.
- The following actions may cause an error tone:
  - Pressing an invalid button combination.
  - Selecting a restricted feature.
  - Dialing a restricted or invalid number.
  - Dialing too slowly between digits.
  - Waiting too long before performing the next step.
  To correct an error tone, hang up and try again.
- Many features “time-out” if you wait too long before performing the next step. If this happens, you must start over.
- “Off-hook” means the handset is lifted. “On-hook” means the handset is in the cradle.
- If your telephone does not have a lamp under the speaker button, the large message indicator lamp on the top right of the telephone indicates that the speakerphone is in use.

Comfort and Safety Tips

Observe the following comfort and safety tips when using the telephone:

- **Do not cradle the handset**: Prolonged use of the handset can lead to neck, shoulder, or back discomfort, especially if you cradle the handset between your neck and shoulder. If you frequently use the telephone, you might find a headset more comfortable. See “Headset Instructions” on page 7.
- **Adjust the viewing angle**: The built-in stand tilts to give you a better view of the buttons. See “Adjusting the Viewing Angle” on page 9.
- **Protect your hearing**: Because prolonged exposure to loud sounds can contribute to hearing loss, keep the volume at a moderate level. You can adjust the volume levels of the handset receiver or headset. See “Changing Volume Levels” on page 11.
Headset Instructions

Your telephone is designed to work with a headset that has a 4-pin, RJ-type connector. User satisfaction for any particular headset can be quite subjective, so Mitel recommends that you try before buying so you are more likely to be satisfied with the fit, quality, and cost of the solution. This recommendation includes all wired and wireless headsets, including the integrated Plantronics® CS50 Headset. In addition, Mitel recommends using a headset with a built-in microphone to avoid audio feedback (echo).

Wireless Considerations: To operate, the Plantronics CS50 Wireless Headset must remain within the system’s range operating limit from the base. Refer to the Plantronics CS50 Wireless Headset System User Guide for more details.

When using a headset, press 🎤 (Speaker) to connect to or disconnect from calls. The Headset icon 🎤 appears when the headset is in use. You cannot use the handset or speakerphone when the telephone is in Headset Mode. Disconnecting the headset automatically enables the handset.

To connect and activate the headset:
1. Insert the headset jack into the Headset port 🎤 located on the back of the telephone.
2. Dial 317 (Headset on/off). HEADSET MODE ON appears.

To turn off Headset Mode and activate the handset and speakerphone:
Dial 317 (Headset on/off). HEADSET MODE OFF appears.
Personalizing Your Telephone

This chapter describes features you can use to personalize your telephone.

Adjusting the Viewing Angle

You can tilt the telephone stand for a better view of the buttons and display.

To adjust the viewing angle:

1. Turn the telephone so it faces away from you.
2. Hold the base firmly, and then press the tabs on the sides of the stand to release and detach the base unit.
3. Hinge the hooks on the base unit into the notches on the back of the telephone, and then snap into place as follows:
   - *For a high-angle mount,* hinge the two lower hooks into the bottom set of notches, and then snap the two upper hooks into the middle set of notches.
   - *For a low-angle mount,* hinge the two lower hooks into the middle set of notches, and then snap the two upper hooks into the top set of notches.
Installing Designation Cards

If you program buttons on your telephone (see page 13), you can install a new paper designation card with the revised button labels. (Paper designation cards are provided by your system administrator.) You can usually slide the paper designation card out and replace it without removing the lens (if necessary, see the following instructions to remove the lens).

You can remove the lens and install a fixed Mylar® designation card, which has labels for the three menu buttons under the display. Contact your system administrator for the Mylar designation card.

To remove the lens and install the fixed Mylar designation card:

1. Remove the screw that holds the option module on the back of the telephone. Keep the screw in a safe place—you must use it in step 6.
2. Lift the lower edge of the option module until you feel the inner tabs release, and then gently lift the upper edge of the module. (To avoid damaging the module or the lens, always lift the lower edge of the module first.)
3. Remove the lens by lifting the upper edge, and then sliding the lower edge down.
4. Place the fixed Mylar designation card on the face of the telephone.
5. Slide the lens tabs into the underside of the telephone.
6. Snap the lens tightly into place by applying pressure to both the middle and top of the lens. Secure the option module using the screw from step 1.
Changing Volume Levels

You can change the following volume levels:

- Ringer (alerting tone)
- Handset
- Headset
- Background music
- External speaker

**NOTE**

Turning the external speaker volume down to the lowest levels may prevent you from hearing the feature “warning tones” that notify you when errors occur (for example, when you enter an incorrect feature code).

You must be using the feature to change the volume level. For example, if you want to change handset volume level, you must be using the handset. However, you can adjust the ringer (alerting tone) volume level when the telephone is idle.

To change a volume level:

While using the feature, press \( \uparrow \) (Up) to increase the volume or press \( \downarrow \) (Down) to decrease the volume.

To save the volume level:

Press \( \uparrow \) (Up) and \( \downarrow \) (Down) simultaneously. Handset volume 11 cannot be saved.

Changing the Ring Tone

You can select one of nine different ring tones.

To change the ring tone:

1. With the handset on-hook, dial 398.
2. Do one of the following to listen to (or turn off) ring tones:
   - Press 0 to turn the ringer off.
   - Press \( \uparrow \) (Up) or \( \downarrow \) (Down) or 1 to 9 to listen to ring tones.
   - 
3. Press \( \text{Speaker} \), #, or lift and replace the handset to select the ring tone.

Adjusting the Display Contrast

You can adjust the display Contrast setting.

To adjust the Contrast setting:

1. While the handset is on-hook, dial 303.
2. Do one of the following to adjust the contrast:
   - Press \( \uparrow \) (Up) or \( \downarrow \) (Down) to adjust the contrast.
   - Press a number on the dialpad (1 = lightest, 8 = darkest) that corresponds to your desired contrast level.
3. To save the setting, press # or \( \text{Speaker} \).
Changing the Language

Your system administrator can select two of the following languages as the primary and secondary languages to display text.¹

- American English
- British English
- Spanish
- Japanese

For example, if your system administrator programmed your telephone with American English as the primary language, American English is used for display text. You can change the language by selecting the secondary language. Contact your system administrator for more information.

To change the language:

Dial 301 to select either the primary or secondary language. The display shows text in the selected language.

Listening to Background Music

If your system is equipped with a music source, you can listen to background music or system audio (for example, organizational conference calls) through the external speaker.

To turn on or turn off background music:

Dial 313 (on/off). BACKGROUND MUSIC ON (or OFF) appears.

¹. This feature may or may not be enabled for your system.
Personalizing Your Telephone

Using Programmable Buttons

For quick access, you can assign feature codes, extensions, speed-dial numbers, trunks, or other resources to your programmable buttons. You can then press the programmed buttons to activate features or place calls. See “Default Access Codes” and “Default Feature Codes” on page 14 for code lists. You cannot reprogram the default button assignments. See “Programmable Buttons” on page 5.

To program a button:

1. With the handset on-hook, dial 397.
2. Press the button that you want to program. If the button is:
   - not programmed, UNDEFINED KEY appears.
   - programmed, the feature or extension programmed for the button appears.
   - not programmable, NON-PROGRAMMABLE KEY appears.
3. Enter the feature code, extension number, or speed-dial code (0 to 9) to be assigned to the button.

NOTE Before assigning a speed-dial number to a button, the number must be stored with either a Station or System speed-dial code. See “Using Speed Dial” on page 22.

After you program a button, you can:

- Press the button to place a call to the assigned extension.
- Press the button to access a system feature.
- Press the button and then hang up to transfer a call to the assigned extension. If the call is transferred to voice mail you hear repeating double tones.
- Visually monitor the call activity of the assigned extension if the button you assign has a lamp.

The following table describes the lamp signals and the indicated call activity:

<table>
<thead>
<tr>
<th>Lamp Signals</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Continuously Lit</td>
<td>The extension is busy or off-hook.</td>
</tr>
<tr>
<td>Slowly flashing</td>
<td>The extension is in Do-Not-Disturb (DND).</td>
</tr>
<tr>
<td>Quickly flashing</td>
<td>The extension has a call ringing in.</td>
</tr>
<tr>
<td>Continuously flashing</td>
<td>The extension is causing a “Station Off-Hook” system alarm.</td>
</tr>
</tbody>
</table>

Additional Programmable Buttons

You can also use the Programmable Key Modules (PKM) to add additional programmable buttons to your telephone. You can program buttons the same way as those on the associated telephone as described earlier in this section. Contact your system administrator for details.
Default Access Codes

The following are default system access codes. If your system uses different codes, record the codes in the “New Code” column for reference.

Outside Line Access Codes

<table>
<thead>
<tr>

</tbody>
</table>

Default Feature Codes

The following table lists default feature codes. If your system administrator changes any of the default codes, you can record the new codes in the “New Code” column for reference.

**NOTE** Most of the following feature codes work when your telephone is idle. However, if you are on an active call or if the telephone is off-hook, you may need to press (Special) before you enter the feature code to activate the feature.

To delete the characters entered:
Press  (Hold) to move the cursor to the left and delete the characters entered.

To cancel the feature:
Press *.

Personalizing Your Telephone

Viewing Button Assignments

You can view programmable button (key) feature assignments.

To view button assignments:
1. With the handset on-hook, dial 396. PRESS THE KEY TO REVIEW appears.
2. Press any of the feature buttons to display the assignment.
3. Press # or (Speaker) to exit.

Resetting Programmable Buttons

You can reset all buttons (keys) that you have programmed to the default assignments. Resetting the programmable buttons does not reset button assignments programmed by the system administrator.

To reset the feature buttons to the default values:
With the handset on-hook, dial 395. FEATURE KEYS DEFAULTED appears.

Resetting the Telephone to the Default Settings

Resetting the telephone to the default settings does the following:

- Returns all volume settings to the default levels. See “Changing Volume Levels” on page 11.
- Cancels Background Music. See “Listening to Background Music” on page 12.
- Cancels Callback (queue) requests. See “Requesting a Callback (Queuing the Telephone)” on page 21.
- Cancels Manual Call Forwarding. See “Manual Call Forwarding” on page 32.
- Cancels System Forwarding. See “System Forwarding” on page 32.
- Restores Page settings. See “Paging Other System Users” on page 47.
- Resets hunt group calls. See “Hunt Groups” on page 49.

To reset your telephone to the default settings:
Dial 394. STATION DEFAULTED appears.

Switching Keymaps

Keymaps are the default button assignments on your telephone. Your system may have programmed an alternate keymap, allowing you to switch between keymap assignments. Contact your system administrator for more information.

To switch between keymaps when your telephone is idle:
With the handset on-hook, dial 399. The display shows either ALTERNATE (or) STANDARD KEYMAP IS ACTIVE.

To switch between keymaps during a call:
Press (Special), and then dial 399.
Answering and Placing Calls

The following instructions describe how to answer and place internal and external calls and how to use related features.

NOTE By default, internal (intercom) calls are assigned to the IC button, and external calls are assigned to the Call buttons.

Answering Calls

Your telephone may be preset to automatically answer incoming internal calls in Handsfree Mode. To disable Handsfree Mode, see “Using Handsfree Mode” on page 29. After disabling Handsfree Mode, you can use your handset or headset to answer incoming calls.

To answer a call:

- Lift the handset, or press (Speaker) to answer a call while using a headset or to answer a call in Handsfree Mode. See “Using Handsfree Mode” on page 29.
- If you are currently on a call, press the flashing IC or Call button to answer a waiting call. See “Answering Waiting Calls” below.

Answering Waiting Calls

If you receive a call while you are on another call, you hear a “call waiting” tone, the IC or Call button flashes, and the display shows the Caller ID information (if available).

To answer a waiting call:

- Press the flashing IC or Call button. This places the first call on hold and connects you to the waiting call. You can also place the first call on hold before you answer the waiting call. See “Placing Calls On Hold” on page 30.

Using Automatic Call Access

Automatic Call Access connects you to incoming internal or external calls when you pick up the handset or press (Speaker). When Automatic Call Access is turned off, you must press the flashing IC or Call button to answer incoming calls.

To use Automatic Call Access for incoming IC calls:

- With the handset on-hook, dial 361 to turn on (or off). AUTO IC ACCESS ON (or OFF) appears.

To use Automatic Call Access for incoming external (trunk) calls:

- With the handset on-hook, dial 360 to turn on or off. AUTO TRNK ACCESS ON (or OFF) appears.
Redirecting Calls

You can redirect incoming calls to another extension or external number.

To redirect calls:
1. While a call is ringing, dial 331.
2. Enter the extension number, or press the Outgoing button or enter the Outgoing Call access code (8), and then enter the external number. The call is forwarded to the number entered.

Using Automatic Trunk Answer

You can use Automatic Trunk Answer to answer incoming external calls for other internal parties who are members of an “Answer Access” list. Your system administrator creates Answer Access lists. Contact your system administrator for Answer Access list extensions.¹

Automatic Trunk Answer answers calls in the order they are received (that is, the first call received by any extension in the Answer Access list is the first one answered).

To use Automatic Trunk Answer:
1. While an incoming external call is ringing at another Answer Access list extension, lift the handset or press (Speaker).
2. Dial 350 or press the flashing Trunk <number> button.

Placing Calls

The following instructions describe how to place calls and related features.

Placing Emergency Calls

WARNING

Contact your system administrator and your local Mitel provider for important information about dialing emergency services before using your telephone.

When dialing an emergency number (911 U.S. or 999/112 Europe), you do not have to press the Outgoing button or enter the Outgoing Call access code (8 is the default code). The system automatically places emergency calls immediately after you dial the number, even if you do not select an outside line.

¹ This feature may or may not be enabled for your system.
Placing Internal Calls

Internal calls are calls placed to other extensions in the system. Internal calls are assigned to
the Intercom (IC) button on your telephone. Contact your system administrator for a list of
extension numbers.

To place an internal call:

With or without the handset lifted, dial the extension number. If you enter incorrect digits,
you can press  (Hold) to move the cursor backward, deleting the last digits entered.
If you are using Handsfree Mode, listen for the double tone and then speak.

If there is no answer or if the extension is busy, you can do the following:

• Request a callback (queue). See “Requesting a Callback (Queuing the Telephone)” below.
• Camp-on to the busy extension. See “Using Camp-on” below.
• Leave a message. See “Leaving Messages at Other Extensions” on page 43.

Requesting a Callback (Queuing the Telephone)

When you request a callback (queue the telephone), the system calls you when the extension is
available and places a call to the telephone.

To request a callback:

If there is no answer or if the extension is busy, press  (Special) followed by 6, and
then hang up. QUEUE REGISTERED FOR <name> appears. When the extension
becomes available, your extension rings.

To cancel the callback request:

Press 6. QUEUE REQUEST CANCELED appears.

Using Camp-on

Camp-on keeps you connected to the called extension until it becomes available. You cannot
use Camp-on if the called extension is in DND, or if the call is forwarded to voice mail. See
“Using Do-Not-Disturb (DND)” on page 45.

To use Camp-on:

Stay on the line and wait for the extension to become available. Do not hang up. If
Camp-on is enabled, you hear Music-on-Hold while you are waiting.
Placing External Calls

The following sections describe features used when placing external calls.

To place an external call:

1. Press the Outgoing button, an unlit Call button, or enter the Outgoing Call access code (8 is the default code).
2. Dial the number.

If you cannot place an external call because all outgoing lines are busy, you can request a callback, which prompts the system to contact you when a line becomes available. See “Requesting a Callback (Queuing the Telephone)” on page 21.

If you are prompted for an account code (indicated by a single beep), you must enter an account code before you can place your call. See “Using Account Codes” on page 27.

Depending on system configuration, you may also be able to use one of the following methods to select an outgoing line:

- Enter the Select Line Group feature code. The default codes are 92001 to 92208.
- Enter the Automatic Route Selection (ARS) feature code. The default code is 92000.

Contact your system administrator for more information about using Select Line Group or ARS access codes.

Redialing a Number

You can quickly redial the last external number dialed. You cannot redial extension numbers.

To use Redial:

With or without the handset lifted, press REDIAL. The system automatically selects a line and dials the number.

Using Speed Dial

You can use speed dial to quickly dial stored phone numbers. Speed-dial numbers are either stored in the system (System Speed Dial), or in your telephone (Station Speed Dial).

Using System Speed Dial

Your system administrator assigns Speed-Dial location numbers, which are available to anyone in the system. Contact your system administrator for more information.

To view or dial System Speed-Dial numbers:

1. Dial 381. REVIEW SYS SPEED # <code range> appears.
2. Do one of the following:
   - Press (Up) or (Down) to scroll through the speed-dial locations.
   - Enter the speed-dial location (000 to 999 or 0000 to 4999).
3. Press # to dial the number.
Answering and Placing Calls

Using Station Speed Dial

You can use Station Speed Dial to store phone numbers for your personal use. Other system users do not have access to your Station Speed-Dial numbers.

Storing Station Speed-Dial Numbers

You can store up to 10 Station Speed-Dial numbers.

To store a Station Speed-Dial number:

1. With the handset on-hook, dial 383. PROGRAM STN SPD (0-9) OR SCROLL appears.
2. Do one of the following:
   - Press (Up) or (Down) to scroll through the speed-dial locations.
   - Enter the speed-dial location (0 to 9).
   Press # to select the location.
3. Enter the name of the speed-dial contact (up to 16 characters). For dialpad character descriptions, see “Using the Dialpad Buttons to Enter Characters” below.
4. Press # to save the name.
5. Enter the extension number or external number. If you are storing an external number, enter the Outgoing Call access code (default code is 8) before you enter the number. Do not use hyphens or colons in stored speed-dial numbers.
6. Press # to save the location. STN SPD BIN # <number> UPDATED appears.

Using the Dialpad Buttons to Enter Characters

You can use the dialpad buttons to enter text or numbers for features such as Do-Not-Disturb (see page 45) and Station Speed Dial.

The following are guidelines when entering dialpad characters:

- Press (Message) to switch from Alpha Mode to Numeric Mode. The (Message) button stays lit in Alpha Mode and is off in Numeric Mode.
- Press (Hold) to move the cursor to the left and delete characters.
- Press (Transfer) to move the cursor to the right.
- In Numeric Mode, press # for a hyphen (-).
- In Numeric Mode, press * for a colon (:).
- Press #, (Speaker), or lift and replace the handset to save entries.
To use the dialpad to enter characters:

Press the dialpad buttons as shown in the following table.\(^2\)

<table>
<thead>
<tr>
<th>Button</th>
<th>English/Spanish Characters</th>
<th>Japanese (Katakana) Characters</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>- &amp; ( ) 1 A I U E O a</td>
<td></td>
</tr>
<tr>
<td>2</td>
<td>A B C ' 2 KA KI KU KE KO i</td>
<td></td>
</tr>
<tr>
<td>3</td>
<td>D E F ! 3 SA SHI SU SE SO u</td>
<td></td>
</tr>
<tr>
<td>4</td>
<td>G H I * 4 TA CHI TSU TE TO e</td>
<td></td>
</tr>
<tr>
<td>5</td>
<td>J K L # 5 NA NI NU NE NO o</td>
<td></td>
</tr>
<tr>
<td>6</td>
<td>M N O Ń 6 HA HI FU HE HO tsu</td>
<td></td>

<td>W X Y Z 9 RA RI RU RE RO yo</td>
<td></td>
</tr>
<tr>
<td>0</td>
<td>@ : . , 0 WA WO N pa ba long</td>
<td></td>
</tr>
</tbody>
</table>

For example, to enter **May 31**, you could use the following sequence:

1. In Alpha Mode ([Message] button is lit), press 6 once to enter an “M.”
2. Press 2 once to enter an “A.”
3. Press 9 three times to enter a “Y.”
4. Press [Message] (Message) to switch to Numeric Mode.
5. Press [Transfer] (Transfer) to enter a space.
8. Press [Speaker] (Speaker), #, or lift the handset to save the entry.

**Dialing Station Speed-Dial Numbers**

To dial a Station Speed-Dial number:

Do one of the following:

- Dial **382**, and then enter the Station Speed-Dial location number (0 to 9). The system dials the number.
- Press [Up] (Up) or [Down] (Down) to scroll through the speed-dial locations, and then press # to select the location and dial the number.

\(^2\) Japanese characters are available only if the Multilingual feature is enabled and Japanese is installed as the secondary language.
Deleting Speed-Dial Entries

To delete a Station Speed-Dial entry:

1. With the handset on-hook, dial 383. PROGRAM STN SPD (0-9) OR SCROLL appears.
2. Do one of the following:
   - Press (Up) or (Down) to scroll through the speed-dial locations.
   - Enter the speed-dial location (0 to 9).
3. Press # to select the location.
4. Press (Hold) repeatedly until the name is erased, and then press # to continue.
5. Press (Hold) repeatedly until the number is erased, and then press #. STN SPD BIN # <number> UPDATED appears.

Assigning Speed-Dial Entries to Programmable Buttons

You can assign Station or System Speed-Dial numbers to your programmable buttons.

NOTE Before assigning the speed-dial number to a programmable button, make sure the number has either a Station or System Speed-Dial code assigned to it.

To program a System/Station Speed-Dial button:

1. With the handset on-hook, dial 397. PRESS THE BUTTON TO PROGRAM appears.
2. Press the feature button that you want to program as a speed-dial button.
3. Dial 382 (Station Speed Dial) or 381 (System Speed Dial).
4. Do one of the following:
   - Press (Up) or (Down) to scroll through the speed-dial locations.
   - Enter the speed-dial location (0 to 9 for Station Speed-Dial or 000 to 999 or 0000 to 4999 for System Speed Dial).
Using the Directory

You can use the Directory to find internal or external contacts or find and activate system features. The directory uses Intelligent Directory Search (IDS), which is similar to the “text on 9 keys” (T9) predictive search feature used for mobile phones. The Directory has the following three subdirectories:

- **Intercom**: Find and dial internal numbers.
- **Outside**: Find and dial external numbers listed in the company directory.
- **Feature**: Find and activate system features.

When searching the directory, dialpad buttons can represent several characters, as shown in the following table. As you enter characters, the entries that best match the characters entered appear. The system connects the character sequence to possible directory matches. For example, to find the name “Jones,” dial 56637.

<table>

**Up** (Up) Scroll to next entry

**Down** (Down) Scroll to previous entry

* Cancel search

# Activate selection

(Hold) Move the cursor to the left, deleting existing characters

See the following section on using the directory.

**To search for a directory name or feature:**

1. Press  (Directory), and then press one of the following:
   - 1 for the IC directory.
   - 2 for the Outside directory.
   - 3 for the Feature directory.

2. Press the dialpad buttons to enter (up to 20) characters. See the table on page 26 for dialpad button character descriptions.

3. Press  (Up) or  (Down) to scroll through the entries.

4. Press # while the display shows the entry to dial a number or activate a feature code.
Using Account Codes

Account codes record information for telephone record reports. You may be required to enter account codes when placing calls. Contact your system administrator for more information about using account codes.

There are three types of account codes:

- **Standard account codes**: Automatically entered into the telephone record report whenever you place a call.
- **Forced account codes**: Entered before you can place an outside call.
- **Optional account codes**: Entered at any time during a call.

**To enter an optional account code:**

1. While off-hook, press ✆ (Special), and then dial 390.
2. Enter the optional account code, and then press #.

**To set an account code for all calls placed from your telephone:**

Dial 391 followed by the account code, and then press #. This code is used for all calls made from your telephone until it is disabled.

**To disable the code:**

Dial 391, and then press #. ACCOUNT CODE CLEARED appears.
Call Features

The following sections describe call-related features.

Using Handsfree Mode

You can use Handsfree Mode to activate the speakerphone.

To use Handsfree Mode:

- With the handset on-hook, dial 319. HANDSFREE MODE ON appears. Dial 319 to turn handset mode off.

Using Ring Intercom Always

If another extension has Handsfree Mode enabled for incoming internal calls (see the previous section), you can use Ring Intercom Always to override Handsfree Mode on the extension, requiring the called party to pick up the handset to answer your call.

To override Handsfree Mode for the current call:

1. Before you enter the extension number, press #. RING EXTENSION NUMBER appears.
2. Dial the extension number.

To use Ring Intercom Always to always send non-handsfree calls:

- With the handset on-hook, dial 377. RING IC ALWAYS ON appears. Dial 377 again to turn Ring Intercom Always off.

Using Mute

You can use Mute to temporarily turn off your microphone, preventing the other party on the call from hearing you.

To mute or unmute the microphone:

- While on a call, press Mute on. MICROPHONE MUTE ON appears. When the microphone is muted, the Mute button lamp is lit. Press Mute again to unmute the microphone.

NOTES

- The Ring Intercom Always feature prevents calls from being answered in Handsfree Mode (see the following section).
- You cannot use Handsfree Mode if you are using a headset, or if you have more than one telephone assigned to an extension number.
- The telephone uses half-duplex audio when using the speakerphone (both parties cannot talk at the same time).
Placing Calls On Hold

You can place calls on either Individual Hold or System Hold.

- **Individual Hold**: Places an internal or external call on hold at your telephone.
- **System Hold**: Places an external call on hold in the system. You can then pick up the call from any telephone that indicates a flashing Call button for the call, including the telephone that placed it on hold.

**To place a call on Individual Hold:**
1. Press (Hold). ENTER EXTENSION NUMBER appears.
2. Hang up or place another call.

**To place an outside call on System Hold:**
1. Press ☐️ (Special), and then dial 335. ENTER EXTENSION NUMBER appears.
2. Hang up or place another call.

**To return to a call that is on hold:**
Press (Hold), and then lift the handset or press ☐️ (Speaker). <Caller> WAS HOLDING appears.

Entering a Hookflash

Some telephone companies require you to enter a hookflash (a quick hang up and release) for feature access.

**To enter a hookflash:**
While off-hook, press ☐️ (Special), and then dial 330.

Transferring Calls

You can transfer calls to other extensions or external numbers. You can also transfer conference calls. See “Transferring a Conference” on page 36 for more information.

Transferring Calls to Other Extensions

**To transfer a call to another extension:**
1. While on the call, press ☛ (Transfer), and then enter the extension number.
2. Do one of the following:
   - Wait for an answer, announce the call, and then hang up. If the extension is unavailable, press the flashing IC or Call button to return to the caller.
   - Hang up to transfer the call and disconnect the call from your telephone.

**NOTE**
If your system administrator has enabled Transfer-on-Connect for your telephone, you are automatically connected to calls transferred to your extension after the transferring party hangs up. If this option is turned off, you must press a Call button to answer calls transferred to your extension.
Transferring Calls to External Numbers

To transfer a call to an external number:
1. While on the call, press  (Transfer).
2. Press the Outgoing button or the Outgoing Call access code (the default code is 8) to select an outside line.
3. Dial the phone number.
4. Do one of the following:
   - Wait for an answer, announce the call, and then hang up. If the extension is unavailable, press the flashing Call button to return to the caller.
   - Hang up to transfer the call and disconnect the call from your telephone.

Using Reverse Transfer

You can use Reverse Transfer (Call Pick Up) to answer calls that are ringing or holding at other extensions. For example, if you receive a call while you are away from your desk, you can pick up the call from another extension.

To use Reverse Transfer:
1. Lift the handset, and then press 4. ENTER EXTENSION NUMBER appears.
2. Dial the extension or hunt group number where the call is ringing or holding. The call is transferred to the telephone you are using and you are connected to the caller. See “Hunt Groups” on page 49 for more information about using hunt groups.

Viewing Your System Information

If you are on a call, you can temporarily view your user information (your user name and your extension number) and the date and time.

To display your user information and the date and time:
Press  (Special), and then dial 300.

Viewing Caller ID Information

If you are currently connected to an external caller with Caller ID, you can toggle between the caller’s name and number. If the name is unavailable, CANNOT ACCESS FEATURE appears.

To show the outside party’s name/number:
Press  (Special), and then dial 379.

Forwarding Calls

You can use Manual Call Forwarding (see page 32) or System Forwarding (see page 32) to forward calls.
Manual Call Forwarding

The following table describes Manual Call Forwarding options.

<table>
<thead>
<tr>
<th>Call Forward Feature</th>
<th>Description</th>
<th>Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>Call Forward All Calls</td>
<td>All incoming calls are forwarded.</td>
<td>355</td>
</tr>
<tr>
<td>Call Forward if no Answer</td>
<td>All incoming calls are forwarded if not answered.</td>
<td>356</td>
</tr>
<tr>
<td>(The timer is set by the</td>
<td>System administrator.)</td>
<td></td>
</tr>
<tr>
<td>Call Forward If Busy</td>
<td>When your telephone is busy, all incoming calls</td>
<td>357</td>
</tr>
<tr>
<td></td>
<td>are forwarded without ringing.</td>
<td></td>
</tr>
<tr>
<td>Call Forward If No Answer/Busy</td>
<td>All incoming calls are forwarded if your telephone</td>
<td>358</td>
</tr>
<tr>
<td></td>
<td>is busy, or if you do not answer.</td>
<td></td>
</tr>
</tbody>
</table>

To use Manual Call Forwarding:

1. Press the Fwd button or dial the Manual Call Forwarding feature code from the table above. ENTER FORWARD DEST appears.
2. Enter the extension number or press the Outgoing button, and then dial the phone number. FWD ALL CALLS TO <number> appears.

To cancel a Manual Call Forwarding request:

Do one of the following:

- Press the Fwd button, and then press (Speaker), or lift and replace the handset. ANY CALL FORWARD CANCELED appears.

System Forwarding

You can use System Forwarding to route calls based on the type of call and the idle or busy status of your telephone. You cannot program the System Forward destination. You can only turn it on or off. Contact your system administrator for more information.

To turn on or turn off System Forwarding:

Dial 354 to turn System Forwarding on. SYSTEM FORWARD ON appears. Dial 354 again to turn System Forwarding off.
Using Personal Call Routing

When you enable Personal Call Routing on your phone, your incoming calls are automatically routed to one or more preprogrammed associated destinations according to the routing steps programmed for you.

Typically, your desk phone is configured to be your main extension. You may be programmed for up to five associated destinations including:

- softphone
- home IP phone
- voice mail
- mobile phone
- home phone

Your desk phone, softphone, home IP phone and voice mail extensions are already programmed in the system, so your system administrator can easily include them in your routing steps. To include your mobile and home phone numbers in your routing steps, you will need to provide these numbers to your system administrator.

Personal Call Routing also includes the Handoff feature, which includes the following functions:

- **Push**: The Handoff "push" function allows you to move an active call from your main extension, typically your desk phone, to an associated destination without disconnecting audio. The push function is useful if you are leaving the work area, but want to remain connected to an active call. The push function rings all associated destinations (except voice mail) and you select which device to use to answer the call. When you answer the call, you are immediately connected to the other parties at the new destination. When the call is switching over to the new destination, there may be a momentary break in audio, which may be noticeable to the other parties on the call.

- **Pull**: The Handoff "pull" function allows you to pull a call that was previously routed to your mobile or home phone back to the main extension. The pull function is useful if you answer a call on your mobile phone and then return to your desk. After you pull a call back to the main extension, the call is connected immediately and you can then access system features such as conference, hold, and transfer.

The Handoff feature is only supported on your main extension, typically your desk phone. However, if you share a desk phone with one or more coworkers and your main extension is a phantom extension, you cannot use the Handoff feature.

Personal Call Routing includes the following feature codes:

- Personal Call Routing On: 363
- Personal Call Routing Off: 362
- Personal Call Routing On/Off: 364
- Personal Call Routing – Handoff (push and pull): 388

The following call types do not follow Personal Call Routing:

- Hunt group calls
- Hunt group announcement/overflow calls
- Transfer recalls, Hold recalls, Conference recalls, and Attendant recalls

A recall occurs when a feature cannot be completed or the feature times out, and the call returns to the originating extension. For example, a holding call will recall the extension where it was placed on hold when the hold timer expires.
When you enable Personal Call Routing, your incoming calls are routed as specified by the routing type programmed for you by your system administrator. The table below provides descriptions for the default routing types.

<table>
<thead>
<tr>
<th>Routing Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mobile Twinning</td>
<td>Calls simultaneously ring your desk phone and mobile phone, before going to voice mail.</td>
</tr>
<tr>
<td>Delayed Mobile Twinning</td>
<td>Calls ring your desk phone first, and then ring both your desk phone and mobile phone, before going to voice mail.</td>
</tr>
</tbody>
</table>

Check with your system administrator to see which routing type has been programmed for you. Your administrator can modify these routing types by adding or removing routing steps, adding or removing destinations, and changing the ring timers, if required.

To ensure that calls are routed correctly to your mobile and home phones, inform your system administrator if either of these phone numbers change.

**To enable Personal Call Routing:**
- Dial 363 or 364. PERSONAL ROUTING ON appears on the display.

**To disable Personal Call Routing:**
- Dial 362 or 364. PERSONAL ROUTING OFF appears on the display.

**To answer a call routed to your mobile or home phone:**
1. Answer the call when it rings your phone. After you speak, the Personal Call Routing prompt is played.
2. Do one of the following:
   - Press # to accept the call.
   - Press * to send the call to the voice mailbox associated with your main extension (not your mobile phone or home phone voice mailbox). If you do not have a voice mailbox, the "Press *..." prompt is not played and the call is routed to your main extension.

If you hang up, the call continues to follow your programmed routing steps.

**To use the Personal Call Routing – Handoff “push” feature:**
1. While on an active call at your phone, press ☏ (Special), and then dial 388. HANDOFF IN PROGRESS appears on the display and the call rings all of your associated destinations (except voice mail).
2. Answer the call at one of your associated destinations. For mobile and home phones, press # to accept the call.

**To use the Personal Call Routing – Handoff “pull” feature:**
While on an active call on an associated destination device, lift the phone handset and dial 388. A confirmation tone is played and the call is pulled back to your phone.

**NOTE** If you enter the handoff feature code (388) and the display shows NO CALL TO HANDOFF, the call cannot be handed off (see page 55).

**To cancel the Personal Call Routing – Handoff feature:**
While the handoff is in-progress, press ☏ (Special), and then dial 388. HANDOFF CANCELLED appears on the display for your main extension.
Placing Conference Calls

You can place a conference call with up to three internal or external parties (for a total of four parties, including yourself).

To place a conference call:
1. While on the first call, press the Conf button to place the call on hold. CALL NEXT PARTY TO CNF appears.
2. Place a call to the next conference party (for external calls, press the Outgoing button or the Outgoing Call access code [8 is the default code], and then dial the number).
3. After the party answers, announce the conference, and then press the Conf button to place the call on hold. If necessary, repeat this step to add the remaining conference party.
4. Press the Conf button again to start the conference. CNF IN PROGRESS appears.

Adding a Conference Party

You can add a conference party during the conference.

To add a conference party:
1. Press the Conf button. This leaves the conference parties connected.
2. Place a call to the party to be added to the conference, and then announce the conference. Press the Conf button (twice) to add the party and rejoin the conference.
Transferring a Conference

You can transfer an existing conference to another extension.

To transfer a conference:

1. During the conference, press (Transfer), and then dial the extension number.
2. Announce the conference (if desired), and then hang up. CONFERENCE TFR from <name> appears on the called party’s display. The party must then press the flashing Conf button to connect to the conference.

Dropping Out of a Conference

You can drop out of a conference and return to the conference later.

To drop out of a conference:

Press the Conf button or (Hold), and then hang up. ENTER EXTENSION NUMBER appears. This removes you from the conference but leaves the other parties connected.

To return to the conference:

Press the flashing Call button. CONFERENCE WAS HOLDING appears, and you are reconnected to the conference.

Ending a Conference and Placing all Parties on Hold

You can end a conference and place all conference parties on Individual Hold, allowing you to toggle between the held parties and speak to one party at a time.

To end a conference and place all parties on Individual Hold:

Press the Conf button, and then press (Hold). CONFERENCE PARTIES ON HOLD appears.

To toggle between the held callers:

Press (Hold) twice for internal parties or the applicable Call button for external parties.
Using Record-A-Call

You can use Record-A-Call to record an ongoing call as a mailbox message.¹ You can then retrieve the message from your voice mailbox. The Record-A-Call feature stays active after the other party hangs up, so you can add to the recorded call with your own message.

To use Record-A-Call:

1. While on a call, press ☐ (Special), and then dial 385. REQUESTING RECORD-A-CALL appears.
2. Enter the voice mailbox number where you want the recording to be saved. RECORD-A-CALL IN PROGRESS appears, and both you and the calling party hear a confirmation tone (if enabled).

| NOTE | Your system administrator can assign the Record-a-Call voice mailbox destination. If so, you do not need to enter the voice mailbox number. |

To stop Record-A-Call:

Do one of the following:

- Press ☐ (Special), and then dial 385.
- Hang up.

Using Group Listen

You can use Group Listen to activate the speaker while you use the handset or headset to continue speaking. This allows other people to hear the other party on the call while the other party can only hear you (through the handset microphone). You cannot use Group Listen in Handsfree Mode.

To use Group Listen:

While on a call, press ☐ (Special), and then dial 312 to turn Group Listen on. GROUP LISTEN ON appears, and you hear a confirmation tone. The other party does not hear the confirmation tone. Dial 312 again to turn Group Listen off.

¹ This feature may or may not be enabled for your system.
Using Call Logging

Your call logs are records of your most recent missed, received, and dialed calls. A maximum of 20 entries are stored in each call log.²

You can use Call Logging to:

- View recent call activity.
- View caller ID information.
- Return or redial calls.

To use Call Logging:

1. Dial 333.
2. Select one of the following options:
   - Press 1 (MISS).
   - Press 2 (RCV).
   - Press 3 (DL).
   - Press 4 (CLR).
3. Press ▲ (Up) or ▼ (Down) to scroll through the entries.

   The display shows the party’s name and the extension or outside number (if available) and the date and time.

   If no Caller ID information is available, UNKNOWN CALLER appears.

To return a call or redial a number listed in a call log:

Press # while the display shows the number.

To delete individual call log entries:

Press 0 to delete the displayed entry.

---

² This feature may or may not be enabled for your system.
Using Secondary Extension Buttons

Secondary Extension buttons must be programmed by your system administrator. You can use programmable buttons as “secondary extensions.” Secondary Extensions are assigned to other extensions in the system (primary extensions). Because Secondary Extension buttons are programmed by the system administrator, you cannot change the buttons (for example, assign features to the buttons).

When programmed, you can use Secondary Extension buttons to:

- Place an internal call to the primary extension.
- View the call activity at the primary extension.
- Transfer calls to the primary extension.
- Answer a call that is ringing or holding on any Call button at the primary extension.

Remote Programming

You can use Remote Programming to access the DND, Call Forwarding, and Personal Call Routing features from another system phone or an external phone.\(^3\)

**NOTE**

You can use Secondary Extension buttons to notify you when a given number of calls are waiting at the primary extension.

If a Secondary Extension button is flashing (the primary extension has an incoming call), you can press # before you press the flashing Secondary Extension button to call the primary extension and not answer the incoming call.

Entering a Remote Programming Password

Before using Remote Programming, you should enter a new password.

**To enter a Remote Programming password:**

1. Dial 392. ENTER PASSWORD appears.
2. Enter your current password (the default password is your extension number), followed by #. CHANGE PASSWORD TO appears.
3. Enter the new password followed by #. VERIFY PASSWORD appears.
4. Enter the new password again followed by #. DATABASE UPDATED appears.

To change the station password from another phone, see “Using Remote Programming to Change the Password” on page 40.

---

\(^3\) This feature may or may not be enabled for your system.
Using Remote Programming to Change the Password

You can use Remote Programming to change the station (telephone) password.

To use Remote Programming to change the station password:

1. Do one of the following:
   - Call your DISA number (provided by your system administrator). If necessary, enter your (DISA) password.
   - Use any phone on the system.
2. Dial 359.
3. Enter your extension number.
4. Enter your password followed by #.
5. Dial 392.
6. Enter the new password followed by #.
7. Enter the new password again followed by #.

Using Remote Programming to Change DND Settings

See “Using Do-Not-Disturb (DND)” on page 45 for more information about using DND.

To use Remote Programming to turn on DND:

1. Do one of the following:
   - Call your DISA number (provided by your system administrator). If necessary, enter your (DISA) password.
   - Use any phone on the system.
2. Dial 359.
3. Enter your extension number.
4. Enter your password followed by #.
5. Dial 370.
6. Enter the DND message number (01 to 20), and then enter the second-line message text (if applicable).

To use Remote Programming to turn off DND:

Follow steps 1. through 4. above, and then dial 371.
Using Remote Programming to Forward Calls

See “Manual Call Forwarding” on page 32 for more information about Manual Call Forwarding.

To use Remote Programming to turn on Manual Call Forwarding:

1. Do one of the following:
   - Call your DISA number (provided by your system administrator). If necessary, enter your (DISA) password.
   - Use any phone on the system.
2. Dial 359.
3. Enter your extension number.
4. Enter your password followed by #.
5. Dial one of the following Call Forwarding feature codes:
   - 355 (All)
   - 356 (No answer)
   - 357 (Busy)
   - 358 (No Answer/Busy)
6. Enter either an extension number or 8 followed by a phone number.

To turn off Call Forwarding:
Dial 355, and then hang up.

Using Remote Programming for Personal Call Routing

See “Using Personal Call Routing” on page 33 for more information about Personal Call Routing.

To use Remote Programming to enable Personal Call Routing:

1. Do one of the following:
   - Call your DISA number (provided by the system administrator). If necessary, enter your DISA password.
   - Use any telephone on the system.
2. Dial 359.
3. Enter your extension number.
4. Enter your password followed by #.
5. Dial 363 (Personal Call Routing On).

To use Remote Programming to disable Personal Call Routing:
Follow steps 1. - 4. above, dial 362 (Personal Call Routing Off), and then hang up.
Messages

This section describes the following system messaging features:

- **Inter-station messages**: Inter-station messages are alerts sent to your telephone by other internal parties, notifying you to contact the party who left the message. The \(\text{Message}\) button and Message/Ring Indicator flash to notify you of the new message. You can then either delete the message or reply to the message, which automatically places a call to the party who left the message.

- **Do-Not-Disturb (DND) messages**: Messages that other internal parties see when your telephone is in DND. See "Using Do-Not-Disturb (DND)" on page 45.

- **Reminder Messages**: Messages that you can use to notify yourself of upcoming appointments, meetings, and so on. See "Using Reminder Messages" on page 46.

- **Pages**: Announcements sent over telephone speakers or external speakers. See "Paging Other System Users" on page 47.

- **Voice messages**: System voice mail messages.

Leaving Messages at Other Extensions

You can leave inter-station or voice messages for other internal parties.

**To leave an inter-station or voice message for a busy IC extension:**

1. Press \(\text{Message}\). HANG UP OR WAIT FOR MSG CENTER appears.
2. Do one of the following:
   - Hang up to leave an inter-station message. MESSAGE LEFT FOR <name> appears.
   - Stay on the line to connect to the message center (usually voice mail).

**To leave an inter-station message without placing an internal call:**

1. Dial 367 (Leave Message). LEAVE MESSAGE ON EXTENSION appears.
2. Enter the extension number. MESSAGE LEFT FOR <name> appears.
Messages

Viewing and Responding to Messages

When you have waiting messages, the (Message) button and Message/Ring Indicator flash and the display shows the number of waiting messages.

NOTE: If your handset or speakerphone is off-hook when you view a inter-station message, you automatically call the party who left the message.

The display shows new messages as follows:

- Inter-station messages sent by other internal parties are indicated by the party's programmed user name.
- Voice messages are indicated by FROM MBOX <your extension number>.

To view or respond to messages:

1. With the handset on-hook, press (Message). Messages are displayed as first in/first out. If there is more than one message, you can repeatedly press (Message) to scroll through the messages.
2. When the desired message is displayed, press #, or lift the handset for privacy, and then press # to respond. (If your handset is off-hook and you press (Message), you automatically place a call to the party or message center who left the message.)

Canceling Messages Left at Other Extensions

You can cancel messages left at other extensions.

To cancel a message left at another extension:

1. Dial 366. CANCEL MESSAGE ON EXT # appears.
2. Enter the extension number where you left the message. MESSAGE CANCELED FOR <name> appears.

Deleting Waiting Inter-Station Messages

You can delete waiting inter-station messages.

NOTE: To delete waiting voice messages, you must connect to your voice mailbox.

To delete waiting inter-station messages:

2. Press * to delete the displayed message.
Using Do-Not-Disturb (DND)

You can use DND to stop calls and pages to your extension. When activated, internal calling parties see your selected DND message. DND does not block queue callbacks, recalls, and incoming external calls. The following table shows the 20 default DND messages. If your system administrator changes your DND messages, you can record the new messages in the "New Message" column for reference.

<table>
<thead>
<tr>
<th>Code</th>
<th>Default Message</th>
<th>New Message</th>
<th>Code</th>
<th>Default Message</th>
<th>New Message</th>
</tr>
</thead>
<tbody>
<tr>
<td>01</td>
<td>Do-Not-Disturb</td>
<td></td>
<td>11</td>
<td>Out of Town ‘Til</td>
<td></td>
</tr>
<tr>
<td>02</td>
<td>Leave a Message</td>
<td></td>
<td>12</td>
<td>Out of Office</td>
<td></td>
</tr>
<tr>
<td>03</td>
<td>In Meeting Until</td>
<td></td>
<td>13</td>
<td>Out Until</td>
<td></td>
</tr>
<tr>
<td>04</td>
<td>In Meeting</td>
<td></td>
<td>14</td>
<td>With a Client</td>
<td></td>
</tr>
<tr>
<td>05</td>
<td>On Vacation/Holiday 'Til</td>
<td></td>
<td>15</td>
<td>With a Guest</td>
<td></td>
</tr>
<tr>
<td>06</td>
<td>On Vacation/Holiday</td>

<td>Gone Home</td>
<td></td>
</tr>
<tr>
<td>10</td>
<td>On Break</td>
<td></td>
<td>20</td>
<td>Out to Lunch</td>
<td></td>
</tr>
</tbody>
</table>

You can enter a second line of text (up to 20 characters) for DND messages. For example, if you select IN MEETING UNTIL, you can enter “3:30” on the second line. When other internal parties try to call you, their displays show “IN MEETING UNTIL 3:30.”

To turn on DND:

1. Press the DND button. SELECT DND MSG # (01-20) appears.
2. Do one of the following:
   - Press ▲ (Up) or ▼ (Down) to scroll through the messages.
   - Enter the two-digit number for the DND message from the preceding table.
3. After selecting the message, enter the additional text for the DND description, if applicable. See "Using the Dialpad Buttons to Enter Characters" on page 23 for dialpad character descriptions.
4. Press ☐☐ (Speaker) or lift and replace the handset.

To turn off DND:

Press the DND button. DO-NOT-DISTURB OFF appears.
Using Reminder Messages

You can use Reminder Messages to alert you at a selected time, up to 24 hours in advance. At the selected time, the Reminder Message signals you with eight short tones and your display shows the message, even if you are on a call.

The following table shows the 20 default Reminder Messages. If your system administrator changes your Reminder Messages, you can record the new messages in the "New Message" column for reference.

<table>
<thead>
<tr>
<th>Code</th>

</table>

To set a Reminder Message:
1. With the handset on-hook, dial 305. SELECT REMINDER MESSAGE # (01-20) appears.
2. Do one of the following:
   - Enter the two-digit number for the message from the table above.
   - Press (Up) or (Down) to scroll through the messages.
3. Press # to select the message.
4. Enter the time you wish to receive the message in hours and minutes (for example, 0900 or 900 for 9:00). Then press #. The display shows the Reminder Message state.
   
   If your system is set for 24-hour format, you must enter the applicable time (1400 = 2:00 P.M.).
   
   If your system is set for 12-hour display format, press 1 for A.M. or 2 for P.M.

To cancel all Reminder Message requests:
With the handset on-hook, dial 306. REMINDER MSGS CANCELED appears.

To clear a received Reminder Message:
With the handset on-hook, press *.
Paging Other System Users

You can place page announcements through telephone speakers or external speakers (if applicable). Your system may use page zones to prevent announcements from transmitting through every telephone in the system. Each page zone contains a different combination of extensions and external paging equipment.

Contact your system administrator for page zone information. You can use the following table to save the page zone information for future reference.

<table>
<thead>
<tr>
<th>Page Zone Name</th>
<th>Number</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Placing a Page Announcement

To place a page announcement:

1. Press 7.
2. Enter the page-zone number (0 to 9).
3. Wait for the tone, make your announcement, and then hang up.

Enabling or Disabling the Paging Feature

You can enable or disable the Page feature for your extension. If your extension is assigned to more than one page zone, the Page on/off feature code enables or disables your extension for all pages zone (you cannot select individual zones).

To enable or disable paging for your telephone:

Dial 325 to enable paging. PAGE RECEIVE ON appears. Dial 325 again to disable paging.
Hunt Groups

Hunt groups are groups of internal parties (agents) who share a common (hunt group) extension number. Calls can either be placed to the hunt group (using the hunt group extension number) or to a specific agent (using the agent’s extension number). Hunt groups are programmed by the system administrator.

Hunt groups types are either “UCD” or “ACD.”

- **UCD Hunt Groups**: Uniform Call Distribution (UCD) agents do not log in to the hunt group to receive calls.

- **ACD Hunt Groups**: Automatic Call Distribution (ACD) agents log in to the ACD hunt group to receive calls. Calls are distributed by either Agent IDs or extensions:
  - **Agent IDs**: Each agent is assigned an Agent ID number for logging in to the hunt group (see the next section). Hunt group calls are distributed to logged-in agents according to their Agent ID number instead of their extension number. Agents can log in to any ACD hunt group phone.
  - **Extensions**: Hunt group members do not use Agent IDs, and calls are distributed to phones where the agents are logged in.

Logging in to ACD Hunt Groups

You must log in to an ACD hunt group to receive hunt group calls. To stop calls, you either log out of the ACD hunt group or divert calls. See “Diverting Hunt Group Calls” on page 51.

**NOTES**

Only one agent can be logged in to an telephone.

If the ACD Agent ID Automatic Connect option is enabled for your hunt group and you are using a headset, you are automatically connected to waiting calls when you log in. The first call you receive after you log in rings until you answer it; however, you are automatically connected to subsequent calls.

**To log in to or out of all ACD hunt groups in which you are a member:**

Dial 328 to log into an ACD hung group followed by your Agent ID, if necessary. AGENT LOGGED INTO ALL ACDS appears. Dial 328 again to log out of an ACD hung group.

**To log in to one or more ACD hunt groups:**

1. Dial 326. The display shows AGENT LOGIN ACD HG #.
2. Do one of the following:
   - Enter the ACD hunt group number.
   - Press # to log in to all of your ACD hunt groups.

   The display shows AGENT LOGIN AGENT ID.
3. Enter your Agent ID (if applicable), or press # if you do not have an agent ID. The display shows the log in status for one or all hunt groups.
Logging out of ACD Hunt Groups

You can log out of all ACD hunt groups at once or log out of each hunt group one at a time.

To log out of one or more ACD hunt group:

Do one of the following:

• Dial 328 to log out of all of your ACD hunt groups. The display shows AGENT LOGGED OUT OF ALL ACDS.

• Dial 327 to log out of one hunt group at a time.

If you were logged in to only one hunt group, the display shows AGENT LOGGED OUT OF HUNT GROUP <number>.

If you were logged in to more than one hunt group, the display shows AGENT LOGOUT HG #. Enter the extension number of the ACD hunt group.

Stopping the ACD Hunt Group Wrap-up Timer

Each time you end an ACD hunt group call, a wrap-up timer starts. The default wrap-up time is 15 seconds. Your system administrator can change the wrap-up timer settings.

Until this timer expires, you will not receive another hunt group call; however, you can stop the wrap-up timer to allow calls to your extension.

To stop the wrap-up timer:

With the handset on-hook, dial 329. The display shows ACD WRAP-UP TERMINATED.
Other Hunt Group Features

The following features can be used by ACD or UCD hunt groups.

Requesting Agent Help

You can use Agent Help to request help from a designated “Agent Help Extension” (usually your supervisor) during a call. When your request call rings at the Agent Help Extension, the supervisor can join the call or reject the request.

To use Agent Help:

1. While you are on a hunt group call, press (Infinity) (Special), and then dial 375. If you hear repeating tones, one of the following has occurred:
   - The feature is not available at your telephone.
   - You already have four parties in your call.
   - Not enough system circuits are currently available.
   - The Agent Help Extension is in DND.

2. If not preprogrammed, dial the Agent Help extension number. If the Agent Help Extension accepts the call, AGENT HELP IN PROGRESS appears. If the Agent Help Extension rejects the call, AGENT HELP REJECTED appears.

Diverting Hunt Group Calls

You can temporarily divert hunt group calls, preventing hunt group calls to your extension.

To divert hunt group calls:

Dial 324 to divert calls. The display shows the feature state DIVERT HUNT GROUP CALLS. Dial 324 again to accept calls.
Hunt Groups

Hunt Group Supervisor Features

The following features can be used by hunt group supervisors only.

Accepting or Rejecting Agent Help Calls

Supervisors can accept or reject Agent Help calls.

To accept an Agent Help request:
Answer as usual. Your microphone is automatically muted.

To reject an Agent Help request:
Dial 376. AGENT HELP REJECTED appears.

Monitoring Calls

You can use Station Monitor to connect to a hunt-group call and hear both parties, but you cannot be heard by either one. Station Monitor stops if the hunt group member terminates, transfers, or transfers the call. You can barge-in or “steal” monitored calls, as described in the following sections. You can also record the call. See “Using Record-A-Call” on page 37 for more information about recording calls.

To use Station Monitor:
Dial 321, and then enter the extension number. MONITORING EXT <number> appears. Monitored hunt group members may hear an “activation tone” when the feature is activated.

Using Barge-in

While monitoring a hunt group call, you can use Barge-in to join the call.

To barge-in to a hunt-group call:
Dial 386. BARGE-IN PROGRESS appears.

Stealing Hunt Group Calls

While monitoring a hunt group call, you can “steal” the call from the hunt group member, which disconnects the call from the agent and transfers the call to your extension.

To steal a hunt group call:
Dial 387. CALL STOLEN FROM EXT <number> appears.
Troubleshooting

The following sections can help you solve problems that you may be experiencing with your telephone. Troubleshooting topics include:

- **Contact Information**: Information about system administrator contacts.
- **Error Messages**: Error messages and descriptions.
- **Troubleshooting Tips**: Possible problems and methods to solve them.

Contact Information

Your system administrator can help you with items such as changing your settings or modifying telephone features. System administrator duties include:

- Adding new user accounts.
- Setting the date and time.
- Programming System Speed-Dial numbers.
- Making database changes, such as changing user names and extension numbers.

Contact your system administrator with questions that are not covered in this user guide. If you need further assistance, you can find provider information on the Mitel Web site (www.mitel.com). All sales, service, and support are coordinated at the local level.

Error Messages

The following error messages may appear when using your telephone.

<table>
<thead>
<tr>
<th>Message</th>
<th>Reason</th>
</tr>
</thead>
<tbody>
<tr>
<td>CANNOT ACCESS FEATURE</td>
<td>The feature is enabled but other feature-related conditions were not met. Make sure that all feature-related conditions are met and retry.</td>
</tr>
<tr>
<td>CANNOT ACCESS RESERVED FEATURE</td>
<td>Your system does not support the feature. Contact your system administrator for more information.</td>
</tr>
<tr>
<td>INVALID FEATURE CODE</td>
<td>The feature code entered does not exist. Retry using the correct feature code (see page 14).</td>
</tr>
<tr>
<td>INVALID EXTENSION NUMBER</td>
<td>The extension number entered does not exist. Retry using a valid extension number.</td>
</tr>
<tr>
<td>NO UPDATE PERFORMED</td>
<td>The feature was not completed or one or more feature conditions were not met.</td>
</tr>
</tbody>
</table>
**Troubleshooting Tips**

The following table includes troubleshooting tips for telephone and system features.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The telephone is not working properly.</td>
<td>Contact your system administrator.</td>
</tr>
<tr>
<td>I cannot use one or more of the features described in this guide.</td>
<td>The feature may not be enabled. Contact your system administrator for more information.</td>
</tr>
<tr>
<td>I cannot program System Speed-Dial numbers.</td>
<td>Your system administrator programs System Speed Dial numbers.</td>
</tr>
<tr>
<td>I cannot change the time and date on the telephone display.</td>
<td>Your system administrator programs the time and date. Contact your system administrator if you notice that the date and time are incorrect.</td>
</tr>
<tr>
<td>I am experiencing audio problems on my telephone such as echo, distorted sound, or choppiness.</td>
<td>Contact your system administrator if you are having audio problems.</td>
</tr>
<tr>
<td>The name on the display is incorrect.</td>
<td>Your system administrator assigns display names.</td>
</tr>
<tr>
<td>I cannot use the local phone company star codes (for example, *82, *69) when I press the Outgoing button or use the Outgoing Call access code (8 is the default code) when calling an external number.</td>
<td>Rather than pressing the Outgoing button or 8 to access an outside line, you must dial a Select Line Group number before you can use the star codes. For example, if your system is using the default Select Line Group numbers, dial 92001 to access that line. After you have dial tone, you can dial the star code and the number.</td>
</tr>
<tr>
<td>I cannot use the Agent Help or Record-a-Call features.</td>
<td>Contact your system administrator.</td>
</tr>
<tr>
<td>I cannot program a Station Speed-Dial number to the button I want.</td>
<td>Before assigning the speed-dial number to a programmable button, you must store the number with either a Station or System Speed-Dial code.</td>
</tr>
</tbody>
</table>
| When I try to use the Personal Call Routing Handoff feature (388), the display shows NO CALL TO HANDOFF. | The NO CALL TO HANDOFF display indicates that the call cannot be handed off from your mobile phone to your desk phone because one of the following may have occurred:  
  - You tried to use the handoff feature on a call that has not been routed by Personal Call Routing.  
  - You entered the handoff feature code at the exact time the other party on the call disconnected.  
  - The call on your mobile phone was terminated for some reason. |
When I try to use the Personal Call Routing – Handoff feature (388), the display shows NO CALL TO HANDOFF.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The NO CALL TO HANDOFF display indicates that the call cannot be handed off because one of the following may have occurred:</td>
<td></td>
</tr>
<tr>
<td>• You tried to use the Handoff feature on a call that has not been routed by Personal Call Routing.</td>
<td></td>
</tr>
<tr>
<td>• You tried to use the Handoff feature on a call that the system has not yet recognized as a valid call.</td>
<td></td>
</tr>
<tr>
<td>• You tried to use the Handoff feature on an unsupported extension. The Handoff feature is supported on your main extension only.</td>
<td></td>
</tr>
<tr>
<td>• You tried to use the Handoff feature on a phantom extension. The Handoff feature is not supported on phantom extensions.</td>
<td></td>
</tr>
<tr>
<td>• You entered the handoff feature code at the exact time the other party on the call disconnected.</td>
<td></td>
