## Speeddial

You can edit a pre-assigned Speeddial key using the Options List.

### From the Options Key Menu

1. Press the **Options** key and go to **Preferences**.
2. Press **Select** or **▶**.
3. Press **▼** to go to the **Speed Dial Edit** option.
4. Press **Select** or **▶** and all programmable speed dial key lamps flash.
5. Press the **Speeddial** key to edit.
6. Use the **Backspace** key to change the name text.
7. Enter the number including any access numbers.
8. Press the **Save** key.

### From an Empty or Unassigned Key

1. Press the key for 3 seconds.
2. Enter a name and a number to apply to the **Speeddial** key.
3. Select a line to apply to the **Speeddial** key.
4. Press the **Save** key.

## XML Keys

Your System Administrator can create customized XML menu services that can include weather and traffic reports, contact information, company info, stock quotes, or custom call scripts. They can be assigned to a specific programmable key or accessed under **Options > Services** or the **Services** key.

## Clearspan Feature Access Codes

The main call handling features for the Clearspan system have feature access codes that can be set up as speed dial keys on your phone using the Aastra Phone User Interface. You can also dial the feature access codes directly. See 2823-*nnn* Clearspan Feature Access Codes.
